**DETAILED ACTION**

Claims 1-3 and 5-20 are pending in this application.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-3, 5, 9, 13-14 and 20, drawn to an isolated protein comprising an amino acid sequence of SEQ ID NO: 2 at its amino terminus and, wherein said protein further comprises an amino acid sequence of SEQ ID NO: 7 and a feed additive containing said protein as an effective ingredient.

Group II. Claims 6-7 and 15-16, drawn to a gene comprising the polynucleotide with SEQ ID NO: 6 and encoding the protein of SEQ ID NO: 7.

Group III. Claims 8, 10-12 and 17-19, drawn to a microorganism belonging to *Citrobacter* species producing said protein of group I and a feed additive containing said microorganism.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical features linking the inventions of Group I-III appears to be that they all relate to an isolated protein form *Citrobacter* species having phytase activity. However, Kim et al., (Biotechnol. Letters., 2003, Vol. 25: 1231-1234) disclose the isolation and characterization of a phytase with similar physico-chemical and biochemical properties to the protein of the instant invention, comprising the amino acid sequence of SEQ ID NO: 2.

Therefore the special technical feature linking the inventions of Group I-III does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, Groups I-III are not so linked by the same or a corresponding special technical feature as to form a single inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
